

IRYNA MURASHKO

QA ENGINEER (UKRAINE,ODESA. REMOTE)

About me

I'm Mid-level QA Engineer with over 4 years of experience in web, mobile, and REST API testing, ensuring the excellence of diverse products, including eCommerce, CMS, MLM software, web and mobile banking apps, core banking system, and payment solutions.

In addition to my QA expertise, I've cultivated expertise in finances, business analysis, and product management.

I am passionate about delivering high-quality and user-friendly digital products that meet or exceed user expectations.

Currently, I'm expanding my knowledge and skills in API testing and automation, particularly focusing on JavaScript-based tools like Cypress and Playwright. This ongoing learning ensures that I stay current with emerging technologies and positions me to excel in both manual and automated testing environments.

Technical Skills

Manual testing:

- ✓ - frontend/backend testing
- ✓ - web/mobile app testing;
- ✓ - functional/non-functional testing;

Testing tools:

- ✓ Devtools, BrowserStack, Android studio, Charles, real devices, PerfectPixel, Figma

- ✓ API testing: REST API;

Postman:

- ✓ - JavaScript autotests;
- ✓ - test-runs with CSV data file;
- ✓ - Newman/CLI;

Data Bases:

- ✓ MySQL, PostgreSQL, (experienced); MongoDB (basic)

- ✓ Payment systems testing

TM&bug tracking tools:

- ✓ Jira, Redmine, Notion, Confluence, Trello, Slack

Test artifacts:

- ✓ check-lists, test-cases, test-suites, bug reports, tasks estimation

- ✓ Sentry bug tracking

- ✓ Security testing: ZAP OWASP

- ✓ Performance testing: JMeter;

- ✓ Visual Studio Code: JS code editing

Experience

Middle QA Engineer

FlawlessMLM, Remote | 01/2022 - 03/2024

- **Projects:** eCommerce, CMS, MLM;
- **Tools & Tech:** Chrome Devtools, Browserstack, Figma, Postman(REST API), MySQL, PostgreSQL, ZAP OWASP, Sentry; Redmine, Slack, Notion, Trello
- **Responsibilities:**
 - manual testing of web and mobile applications, covering both frontend and backend (UI/UX, cross-browser, functional testing, security);
 - REST API testing via Postman (backend testing while the frontend is not ready, running tests with CSV data file for comprehensive test scenarios, scripts on JS);
 - reviewing documentation and requirements analysis;
 - business logic testing: design of test-cases and test-suites for complicated, multilevel rewards system;
 - developing test artifacts (check-lists, test-cases design, bug reports);
 - applying SQL queries in relational databases, such as PostgreSQL and MySQL, to validate data integrity;
 - bug tracking and resolution by reproducing issues identified by Sentry, facilitating collaboration with front-end and back-end developers for effective bug fixes;
 - proactive participation in daily meetings, workshops, retrospectives;
 - engaged in communication with client's representatives, addressing inquiries related to product exploration and promptly resolving issues;
 - QA estimation of requirements, familiar/unfamiliar tasks;
 - Alpha-testing of projects of other teams
